# VULCAN PRFU

Ready-for-use triple action fly killer.

- > Broad Spectrum
- > Residual Action
- > Surface Treatment

Vulcan P RFU is arguably the best ready-for-use fly killer available in the UK today. The deadly triple action formula has provided successful control time and time again helping to guarantee your customers satisfaction. The bumper 5L pack offers fantastic value for money while the re-sealable tin-can gives Vulcan PRFU an extremely long shelf life.

Vulcan P RFU has an odourless kerosene base and contains the killing agent permethrin and the knock down agent tetramethrin. The addition of the pyrethroid synergist piperonyl butoxide (PBO) enhances the effect of the permethrin and tetramethrin and inhibits the enzyme response of the target pest which helps to overcome any build-up of tolerance to the chemicals.

- > Deadly Triple Action
- > Indoor/outdoor
- > Space Treatment

Vulcan PRFU is approved in the UK for application as a residual spray and as a 'space' treatment, while also being approved by DEFRA for use against the vectors of blue-tongue. The product is designed for application through a simple atomiser for the control of flies and other flying insects in a wide range of situations including farm buildings. It is also extremely effective as a ready-for-use surface spray for the control of resting or crawling insects.

Vulcan P RFU is approved for the control of; flies, mosquitoes, moths, wasps, ants, cock-roaches, earwigs, silverfish and bristletails, fleas, bed-bugs, beetles, spiders, mites, ticks and lice.

- > No Dilution Required
- > Defra Approved
