CIMETROL SUPER

The best just got better...

Long regarded as the number one product of choice, especially in bedbug control, CimetroI is back, and is now better than ever.

CimetroI Super is the next generation of product for the control of insects. Formulated as an oil-in-water emulsion incorporating a micro-capsule suspension, it provides the best of both worlds. It allows rapid access of the active ingredient to the insect through the oil-in-water emulsion, while providing long-lasting and predictable residual control with the microencapsulates.

Why make CimetroI Super your number one choice?

- Fast flushing and knockdown action
- Rapid kill
- Reliable and long-lasting residual control on all surfaces
- Formulated to tackle metabolic and genetic resistance

CimetroI Super contains 25% w/w cypermethrin, 10% w/w tetramethrin, 20% w/w piperonyl butoxide and 1% w/w pyriproxyfen.

This advanced formulation has the multi-action properties of both of its predecessors, CimetroI and Stingray. CimetroI Super contains a Type I pyrethroid for fast flushing and knock-down, a Type II pyrethroid for rapid kill of the insects (this new formulation contains five times the active material loading compared to earlier products), a metabolic synergist to bypass insect metabolic resistances, and an Insect Growth Regulator (IGR), demonstrating a completely different mode of action, to ensure that any stubborn populations never get to pass their resistant properties onto the next generation.

How do we know all this?

PelGar is committed to bringing you only the best. All our product development goes through the highest degree of testing prior to reaching the market. If a product does not make the grade, it simply won't make it to the distributor's shelf.

CimetroI Super has been rigorously tested in both the field and the lab on a range of crawling and flying insects. In lab tests multiple species were tested against a variety of common surfaces. The results showed total kill of all insects that were directly exposed to the insecticide with little or no loss of control 14 days after application.

CimetroI Super is now approved in the UK and will be on sale early 2016.

TECHNICAL INFORMATION

Cimetrol Super – HSE No. 10016

Contains 25% w/w cypermethrin, 10% w/w tetramethrin, 20% w/w piperonyl butoxide & 1% w/w pyriproxyfen.

For use as a surface spray for the control of bedbugs, fleas, cockroaches, beetles (and their larvae), flies, mosquitoes, moths (and their larvae) and wasps. For use inside all domestic, commercial and industrial premises including kitchens, hotels, dormitories and sleeping areas, hospitals (excluding occupied wards), military establishments and food storage and processing areas.

Directions for use

Add a small quantity of water to a suitable compression sprayer and then add product according to the table. Add the remainder of the water, close the sprayer securely, shake to mix contents. Pressurise according to the sprayer manufacturer's instructions. One litre of ready-for-use spray treats 20 square metres of surface. Make up spray as required. Do not store spray overnight. Apply as a constant low pressure spray 1-2 Bar pressure. Some surfaces will absorb more spray, e.g. wall-paper, fabric or brickwork, but hard smooth surfaces can allow spray to run-off.

Fleas: Prior to treatment, thoroughly vacuum the area and seal the contents of the vacuum bag before disposal in the refuse. Apply spray to carpets and soft furnishings, including the underside of cushions and to areas regularly occupied by domestic animals.

Dilution rates

TARGET PEST	PRODUCT	WATER	COMMENTS
CRAWLING INSECTS <i>Routine treatment:</i> <i>Heavy infestation:</i>	25ml	5 litres	<i>Maintenance or 'spot' treatment</i> <i>Attack or 'clean-out' treatment</i>
	50ml	5 litres	
FLYING INSECTS <i>Routine treatment:</i>	25ml	5 litres	<i>For the control of 'resting insects'</i>

Bedbugs: Apply spray to harbourages and resting places on bedframes, headboards and to cracks and crevices around or near the sleeping area. Pay special attention to any loose wall coverings near the sleeping area and to cracks and crevices in bedroom fittings and furniture. Treat under loose carpeting and around doorframes, picture frames and wall cupboards etc.

Cockroaches and other crawling insects: Apply to areas where insects are found, e.g. skirting boards, storage areas, around water pipes, doorframes, window frames, around and behind refrigerators, cabinets, sinks, stoves and the underside of drawers and shelves and to cracks and crevices behind wall-mounted units or fixtures.

This product is approved under The Control of Pesticide Regulations 1986 (as amended) for use as directed. To avoid risks to man and the environment, comply with instructions for use.

Packaging

500ml autodose bottle - up to 20 x 5 litre treatments per bottle.

Precautions

Wear protective gloves/protective clothing/ eye protection/face protection. Wash thoroughly after handling. Do not eat drink or smoke while using this product. IF SWALLOWED: Immediately call a POISON CENTRE or doctor/ physician. IF IN EYES: Rinse copiously with tepid water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get immediate medical advice/ attention. Avoid release to the environment. Dispose of contents/container in accordance with local regulations.

Harmful if swallowed. May cause an allergic skin reaction. May cause allergy or asthma symptoms or breathing difficulties if inhaled. Causes serious eye damage. May cause damage to organs through prolonged or repeated exposure. Very toxic to aquatic life with long lasting effects.
