Fortefog P Fumers

Ready to use insecticidal smoke generators

Contains:
13.25% w/w permethrin

Fortefog P permethrin fumers are simple to use in the home, factory or warehouse, and are effective against a wide range of flying and crawling insects.

Fumers are particularly useful in situations where spraying access is difficult or limited. Tests have shown PelGar fumers are up to ten times more effective than other brands on the market.

Available in four sizes Fortefog P fumers will treat areas from 7.5m³ all the way up to 4000m³ - larger areas can be treated with multiple fumers.

The smaller sizes available, mini and midi, carry the unique blue touch paper fuse. Unlike common fuses these do not spark so reduce the risk of fire and the burning / ignition of carpets/loft insulation etc.

The two larger sizes, maxi and jumbo, are designed for use in industrial / commercial environments and use the standard sparking fuse system.

Why should you use Fortefog P fumers?

- Easy to use with no residual odour
- Blue touch paper non-sparking fuse (mini & midi)
- Quick application - ready to use
- Rapid results

Packaging

Unit packaging:

Mini Fumer 3.5g
Midi Fumer 11g
Maxi Fumer 27g
Jumbo Fumer 100g

Units per case:

Mini Fumer 20 x 3.5g
Midi Fumer 20 x 11g
Maxi Fumer 12 x 27g
Jumbo Fumer 6 x 100g

Technical Information

Insects controlled

For use against flying and crawling insects such as moths, houseflies, clusterflies, fruitflies, mosquitoes, wasps, fleas, bedbugs, ants, cockroaches and stored product insects including saw-toothed grain beetle and adult grain weevils.

Application

Ready to use insecticidal smoke generator.

Areas of use

Fortefog P fumers can be used in domestic situations, public hygiene areas (including hospitals - not occupied wards), industrial and municipal buildings and food handling / storage / manufacturing premises, zoos, pet shops, kennels, veterinary practices and laboratory animal houses (excluding animal pens and cages) and can also be used in empty greenhouses.

Directions for use

Seal area as affectively as possible - close doors and windows, block fireplaces and exclude draughts. Remove all plants, people, and pets (including fish from the area to be treated). Do not contaminate foodstuffs, eating utensils or food contact surfaces. Cover all water storage tanks before application.

Tear off the tag and remove container cap and place each generator on a fireproof base. When a number of smoke generators are being used, space them throughout the area to be treated, and prepare all for ignition before lighting the first one. Ignite generator by using a match or lighter. Light the generators in sequence, starting with the furthest from an identified exit.

Leave for not less than two hours or one hour per 1.5m ceiling height. After treatment is complete, open windows and doors and ventilate thoroughly for at least 30 minutes before using the space.

This product must not be used against houseflies in intensive or controlled environment animal houses because it is likely to cause control failure due to insecticide resistance. Not for use on grain or in empty grain stores.

Rate of application

Consider how many fumers you need for the room to be treated. Heavy infestations may require more than one application. The following table gives an indicative guide:

Fumer	Size	Flying insects	Crawling insects (fleas/bedbugs)	Crawling insects (cockroaches/ants)
Mini Fumer	3.5g	120 m ³	30 m ³	7.5 m ³
Midi Fumer	11g	400 m ³	100 m ³	25 m ³
Maxi Fumer	27g	1000 m ³	250 m ³	62.5 m ³
Jumbo Fumer	100g	4000 m ³	900 m ³	250 m ³

READ THE LABEL BEFORE USE

Storage & Disposal

Keep out of reach of children.
Keep away from heat, hot surfaces, sparks, open flames and other ignition sources.
Dispose of contents/container in accordance with national regulations.

Handling

Avoid breathing dust/fume/gas/mist/vapours/spray. Do not eat, drink or smoke while using this product. Wash thoroughly after handling. If skin irritation occurs: Get medical advice/attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. IF SWALLOWED: Call a POISON CENTER/ doctor if you feel unwell. In case of fire: Use foam, carbon dioxide, dry powder or water fog to extinguish.

Precautions

Harmful if swallowed.
Harmful if inhaled.
May cause an allergic skin reaction.
May cause fire or explosion.
Very toxic to aquatic life with long lasting effects.

WARNING
