

International **EZ BAITER** MULTI-PURPOSE BAIT STATION

When the vertical tubes are not used, it is also quick and easy to monitor bait take/trap activation by removing one of the two caps in the top of the box.

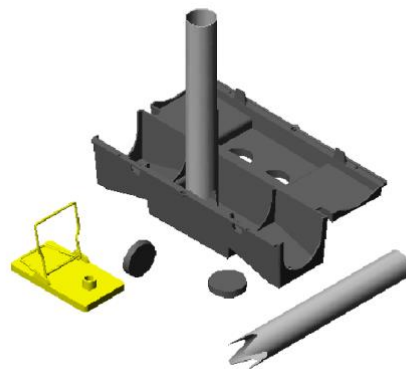

EZ BAITER

EASY TO USE
TRUE MULTI-PURPOSE
SAFETY CONSCIOUS
EASY AND QUICK TO CHECK
ALL YOU NEED TO CARRY

A novel, new, multi-purpose bait station which can be used in many situations.

Loose bait can be placed into the central tray and wax blocks or pasta t-bags can be secured on vertical metal rods that also slot into the central tray. This reserve is also sized to fit a 'snap' rat trap.

Alternatively, two transparent vertical tubes can be slotted into the top down which loose bait or wax blocks can be placed. This allows operators to easily and quickly monitor bait take, and for uneaten bait to remain dry and fresh prior to consumption.
