International

PelGar International is proud to bring you Monark SB, the only difenacoum bait in the USA.

- Specifically formulated for your residential accounts, where primary poisoning of non-target animals is a concern.
- Palatable, lard based formula - Monark SB contains ingredients including: wheat flour, chopped wheat, sugar and lard. It also includes grains and seeds.
- Easy to secure; puncture through center of sachet
- Similar toxicity profile on mice as brodifacoum/difethialone, less toxic than other second generation anticoagulants to non-target domestic animals:

Anticoagulant	Bait Concentration (PPM)	LD50 (g of bait) Mouse	LD50 (oz of bait/lb) Dog
Difenacoum	0.0050%	0.40 grams	16.00oz
Difethialone	0.0025%	0.28 grams	2.56oz
Brodifacoum	0.0050%	0.20 grams	0.08oz

(Data from inchem.org, aspcapro.org and industry sources)

Available in:

16 LB pails: 8 x 2 lb sealed bags of 60 sachets each

Sealed bags prevent bait degradation from occurring as soon as the pail is opened, helping the bait stay fresh longer!

24 LB case: 4 x 6 lb pails

(Each pail 3 x 2 lb sealed bags of 60 sachets each)

Four pails in order to lessen the load as you work during the day, make carrying product around easier!

EPA Reg No. 87235-3
EPA Est No. 87235-GBR-001
