Alphaban 10SC

Residual insecticide concentrate

Contains:

9.8% w/w alpha-cypermethrin

Availability

1 litre bottle and 5 litre flagon

Alphaban 10SC is a high strength insecticide, based on the synthetic pyrethroid alpha-cypermethrin, which gives rapid precipitation and killing of crawling and flying insects. Alphaban 10SC is a concentrate formulation which leaves a highly residual deposit on all common surfaces.

Ideal where no pyrethroid resistance is suspected, Alphaban 10SC has a broad spectrum of activity and performs well on a wide variety of surfaces against cockroaches, scorpions, fleas, house flies. Mosquitos, midges, red-mite and general crawling insects.

Applied with a compression sprayer, the suspension concentrate formulation is less dusty, easier to dose and easier to disperse in water than a wettable powder yet retains the main benefit of insecticidal particles remaining on the surface where they are readily available to the target pest.

Technical Information

Insects controlled

Flies, midges, red-mite, general crawling insects.

Areas of Use

For use in all domestic, commercial and industrial premises including kitchens, hotels, dormitories and bedrooms, hospitals (with the exception of occupied rooms), military establishments and food storage and handling premises.

Application

Compression sprayer

Directions for use

Fill the sprayer with five liters of water. Using a suitable measuring device, add the Alphaban 10 SC, using the dosage indicated below. Close sprayer, agitate to mix contents and pressurize to 50 psi (3.5 bar). One liter of ready-to-use product can treat an area of 20 m². Prepare the necessary quantity. Do not store until the next day.

For routine treatment of crawling insects and surfaces where flying insects rest, use 25 ml of product per 5 liters of water.

For an attack treatment (scorpions) or in the event of a massive infestation, use 50 ml of product per 5 liters of water.

Do not touch treated surfaces or fabrics before complete drying.

Do not spray on surfaces in contact with food.

Remove or cover aquariums before application as this product is extremely toxic to fish.

Do not spray directly on animals.

Rate of Application

Target Pest	Product	Water	Comments
Routine treatment of crawling insects and where flying insects rest:	25ml	5 litres	Maintenance or 'spot' treatment
Heavy infestation and scorpions:	50ml	5 litres	Attack or 'clean-out' treatment

Storage & Disposal

Keep contents tightly sealed in the original container only. Store locked up and out of reach of children. Store in a cool, well ventilated area. Store away from food, drink and animal feeding stuffs. Dispose of the contents and container in accordance with local regulations.

Handling

Wear protective gloves. Wash hands and directly exposed skin after using the product. Do not eat, drink or smoke while using this product. IF SWALLOWED: Immediately call a POISON CENTRE or doctor/ physician.

Precautions

May be corrosive to metals. Harmful if swallowed. Causes severe skin burns and eye irritation. May cause respiratory irritation. May cause damage to organs through prolonged or repeated exposure. Very toxic to aquatic life with long lasting effects.
