Vulcan P RFU

Ready for use triple action fly killer

Contains:
0.25% w/w permethrin
0.125% w/w tetramethrin
0.75% w/w piperonly butoxide

Packaging

5 litre can

Vulcan P RFU is arguably the best ready for use fly killer available today. The deadly triple action formula has provided successful control time and time again helping to guarantee your customers satisfaction. The bumper 5L pack offers fantastic value for money while the re-sealable tin can gives Vulcan PRFU an extremely long shelf life.

Vulcan P RFU has an odourless kerosene base and contains the killing agent permethrin and the knock down agent tetramethrin. The addition of the pyrethroid synergist piperonyl butoxide (PBO) enhances the effect of the permethrin and tetramethrin and inhibits the enzyme response of the target pest which helps to overcome any build-up of tolerance to the chemicals.

Vulcan PRFU is approved for application as a residual spray and as a 'space' treatment, while also being approved by DEFRA for use against the vectors of blue-tongue. The product is designed for application through a simple atomiser for the control of flies and other flying insects in a wide range of situations including farm buildings. It is also extremely effective as a ready for use surface spray for the control of resting or crawling insects.

Vulcan P RFU is approved for the control of flies, mosquitoes, moths, wasps, ants, cock roaches, earwigs, silverfish and bristletails, fleas, bed-bugs, beetles, spiders, mites, ticks and lice.

Why use Vulcan P RFU?
- Broad spectrum
- Residual action
- Surface treatment
- Deadly triple action
- Indoor/outdoor
- Space treatment
- No dilution required
- Odourless
- Defra approved

Technical Information

Insects controlled
For use as a surface spray and/or space treatment for the control of flies, mosquitoes, moths, wasps, ants, cockroaches, earwigs, silverfish and bristletails, fleas, bedbugs, beetles, spiders, mites, ticks and lice.

Application
Hand held sprayers able to produce a fine mist, or by machine powered 'cold fog' equipment.

Areas of Use
For use in domestic, commercial and industrial premises (including kitchens) hospitals (not for use in wards), military establishments, food storage and preparation areas, in and around farm buildings and refuse storage areas and tips.

Directions for use
Vulcan P RFU is a ready for use product and does not require further dilution.

Application as a space treatment
Apply using a fan assisted rotary atomiser or mist blower with ULV attachment or by means of any 'cold fogging' appliance. Vulcan P RFU Fly Spray should be applied at a rate of 1 ml per cubic metre of treatable volume. Spray into the air when using cold fogging or misting equipment and NOT directly at hard surfaces.

Application as a surface treatment:
For the treatment of porous and non-porous horizontal or vertical surfaces. Apply 1 litre of product as a coarse low pressure spray to 25 square metres of sprayable surface using a standard compression sprayer. Pay special attention to areas where flies and other noisome insects rest and congregate. For long-term control of crawling pests use a specific residual agent. Product may 'craze' plastic surfaces

READ THE LABEL BEFORE USE

Storage & Disposal
Keep away from heat, hot surfaces, sparks, open flames and other ignition sources.
Avoid release to the environment.
Dispose of contents/container in accordance with local regulations.

Handling
