PROTECTOR

Natural Insect Killer

Protector Natural Insect Killer contains 0.25% w/w pyrethrins, a natural insecticide purified from flowers of *Chrysanthemum cinerariaefolium* grown in Tanzania and Tasmania.

Protector Natural Insect Killer can be used both as a surface and space spray for the rapid control of a broad spectrum of flying and crawling insects. Once applied the product quickly breaks down into harmless compounds upon exposure to UV light.

Why make Protector Natural Insect Killer your number one choice?

- Rapid action, ready-to-use formulation
- Water based for safety - non-flammable
- Biodegradable - can be used in sensitive areas

Protector Natural Insect Killer is for amateur use against flying and crawling insects such as flies, mosquitoes, ants, cockroaches, wasps, earwigs, silverfish and other bristletails, fleas, beetles, bed bugs, moths and booklice, by application on to hard porous and non-porous surfaces, hard and soft furnishings including bedding; for use indoors in domestic premises, public hygiene areas including kitchens, hospitals (not occupied wards), hotels, restaurants, public and municipal buildings and on board ships.

For use outdoors on patios, paths, amenity areas, transit stations, refuse tips and wasp nests; also for use in and around farm buildings, cow byres, pig sheds, poultry houses and milking parlours.

Available in:
10 x 350ml trigger spray.
12 x 1ltr trigger spray.
