

# RODENTSTOP P™

- Cracks, joints and holes in brickwork and cement.
- Joints and expansion joints.
- Steel, cast-iron and PVC recesses and ducts.
- Settlement cracks.
- Connections between brickwork and drains.
- Sewer connections
- Ducts for (electrical) cables
- Gnawed openings

RodentStop is an effective product to seal seams, cracks and holes to prevent entry from rodents and other pests.

- Contains Metal Shards
- Stays 'gunky' and sticky on the inside for up to 5 years
- Outside sets and is paintable in 48 hours
- Can expand and contract with joints
