

# INSECT CONTROL

PelGar manufactures a broad range of professional insecticides. Below are some highly effective products which are ready-for-use and require minimal training prior to application.

## Vulcan P5 DP- Permethrin Dusting Powder

For the general control of crawling or resting flying insects, including wasps. Vulcan P5 DP can be applied using hand or powered dusters. Vulcan P5 DP is ready-for-use and can be applied in vehicles, accomodation, storage, and kitchen areas (avoid food contact surfaces).

Contains: Permethrin 0.50% w/w  
 Control: Wasps, ants, crawling insects  
 Application: Duster  
 Pack Sizes: 400g duster  
 4kg bucket

## Victor Gel

Victor Gel is a ready-for-use insecticidal gel bait for the control of cockroaches in a range of situations including domestic premises, public buildings, ships and accomodation units.

Victor Gel is a microencapsulated formulation which reduces the speed of effect allowing the cockroaches to return to their harbourages before dying. Further cockroaches are then killed as they cannibalise their peers – beneficial secondary poisoning.

Contains: Imidacloprid 2.15% w/w      Application: Bait gun  
 Control: Cockroaches                      Pack Sizes: 35g tube

PelGar International is the leading British manufacturer of highly effective rodenticide, insecticide, decontamination and insect repellent products. PelGar also develops and supplies NATO registered CBRN products and fabric applied insecticides, protecting personnel from vector borne diseases.

PelGar develops and supplies innovative and novel products to the global market with an active and dynamic R&D program, which draws on a wide range of market intelligence and technical feed-back.

PelGar is operated from its UK headquarters in Hampshire and through local offices in mainland Europe, Africa, Australia and North America. Its analytical and formulation laboratory ensures the highest product quality from its two UK manufacturing sites, while its research centre provides the technical team with valuable insights into product development.

# PERSONNEL PROTECTION

## INSECT REPELLENTS AND INSECTICIDES

**Protecting those who Serve & Protect**

# NATO UNIFORM INSECT REPELLENT

Permapel uniform repellents provide long-lasting and durable protection for military uniforms, helmets, tents, mosquito nets and rucksacks. These highly effective insecticidal treatments have been created to help protect against tropical diseases such as Malaria, Dengue Fever, and West Nile virus by inhibiting mosquitoes, ticks and other biting insects. Available as a liquid concentrate for dipping of fabrics, and as a ready-for-use personal spray for quick and convenient application.

## Permapel Concentrate Uniform Insect Repellent

- Provides protection against mosquitoes, midges, ticks and other biting insects
- Contains 10% permethrin
- Suitable for use in all tropical climates
- Suitable for all types of military/service uniforms
- Use on tents, mosquito nets, rucksacks and camping fabrics
- Use on any civilian clothing
- 3 minute application process
- Simple dilution and immersion application
- Up to 3 month protection against biting insects (dependent on weather and usage)
- Non-staining and odourless

 **NSN 6840-99-300-0661**

## Permapel Ready-For-Use Uniform Insect Repellent

- Fine mist**  
High-quality mist like spray spreads evenly on all surfaces.
- Prolong spray**  
A fixed output of 1.20cc per second is dispensed consistently from first to last drop.
- Continuous spray**  
Repeated actuation produces an endless spray allowing quick and easy coverage of large areas.
- Upside down**  
The bag-in-bottle allows 360 degree spraying for those areas which are difficult to reach.
- Airless**  
Complete air isolation enhances formulation integrity.
- Every last drop**  
No wastage with 98%+ liquid evacuation

- Contains 0.5% permethrin
- 300ml Ready for Use trigger spray bottle
- Repellent provides protection against mosquitoes, midges, ticks and other biting insects
- Can be used on all types of military uniforms, tents and mosquito nets
- Suitable for use in all tropical climates

 **NSN 6840-99-670-14691**

# INSECT PROTECTION AND RELIEF

Protection from insect bites on exposed skin is critical. PelGar produces a Deet cream and spray, additionally a non-Deet alternative is available. Administering relief from bites and stings is important as scratching might lead to serious additional complications

DEET (diethyltoluamide) has long been considered the most effective mosquito repellent. It was originally developed in the USA for military use and is formulated such that the mosquito's receptors are blocked from sensing human sweat, odours or CO2 emissions that attract mosquitoes.

## Deet 34% Cream - Personal Insect Repellent - 60 ml

- Dual action - contains Deet and natural pyrethrins for maximum repellency
- Broad spectrum - effective against mosquitoes, midges, sandflies, horseflies, cleggs, ticks, wasps, hornets, moths, houseflies, fleas, bedbugs and ants
- Ideal for use during deployment or training
- Versatile compact pack; fitting into battle dress/combat fatigues, turn out uniforms pouches or pockets
- Effective protection for up to 8 hours

 **NSN 6840-01-284-3982**

## Deet 50% Spray - Personal Insect Repellent - 100 ml spray

Deet 50% Spray contains a dual action formula which combines natural pyrethrins with deet to provide a high level of protection against biting insects in all environments. The natural pyrethrins act as a bite inhibitor, discouraging actual biting insects including mosquitoes. Each application will last for up to 10 hours. Re-application may be required in areas with high temperature and humidity.

The product contains 50% diethyltoluamide and 0.1% pyrethrins.

## PreVent 20% Spray - Personal Insect Repellent - 100 ml spray

This deet free insect repellent contains the active ingredient Saltidin which is proven to repel mosquitoes, midges, horseflies, sand flies, gnats and ticks.

The 20% Saltidin based formulation offers a high level of protection against biting insects for up to 8 hours. It is more suited for sensitive skin than deet based repellents which can also cause damage to plastics.

## PreVent Bite and Sting Relief

- Instant relief after being bitten
- Contains Witch Hazel
- Suitable for use in all tropical climates
- Easy to apply
- 43 ml dab pen
